Core Competencies

VMX International brings innovative ideas and solutions to the business of a clean environment. As a woman-owned, minority environmental services company, we provide integrated, non-hazardous solid waste collection, recycling and disposal services to government, commercial, industrial and construction customers across the US and Canada. Our team is dedicated to finding effective, sustainable solutions to preserve the environment for future generations.

Solid Waste Transportation & Disposal

From the automotive industry to our large government bases, VMX has saved our customers millions of dollars in solid waste pickup and recycling. We provide solid Waste Transportation and Disposal and have the experience needed to develop the most efficient and reliable transportation and disposal service for you location. No matter what size, VMX will a customized program for your business with state of the art equipment, award winning customer service.

Hazardous Waste

VMX also manages hazardous wastes, for both commercial and our government customers. With over 60 employees, with Hazwoper Certification, as well as many project managers, with Certified Hazardous Materials Management (CHMM), VMX can manage even the most difficult hazardous waste, meeting all local, state and EPA regulations. Let VMX discuss in further detail, our case studies and past performances.

Recycling

VMX has changed the perception of “waste” and instead views waste as potential “resources” for its clients. By developing strategies to effectively manage these resources, VMX will reduce costs and receive credits for these resources. We have a proven track record of developing innovative solutions for hard to recycle items. Our industry standing, large volumes and strong financial position allows you to benefit from prompt payment and great returns on your recyclable materials. VMX can integrate a small recycling program for your facility or set a larger goal for a zero landfill facility, and provide the “road map” to ensure success!

Construction Waste/Leeds Certification

VMX International provided construction debris removal and recycling for Chrysler construction during its \$850 million project at the 425,000-square-foot, state-of-the-art paint shop for the production of future products. Included among the services VMX International has provided, are:

- Assistance in qualifying for LEED® certification
- Construction and demolition, waste removal and recycling of cardboard, paper, plastic, metal, drywall, wood, concrete and asphalt
- Developed customized labeling of roll-off containers-eliminating any cross contamination
- Regular reporting of diversion rates and ratios using VMX’s Recycling Tracking Tools
- VMX located most cost effective off-site recycling facilities - and also "right-sized" containers and transportation for a "value-add" to Chrysler.
